-- The **MAILING DATE** of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3748

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Terms such as "like" on line 12 of claim 1, "as such" on line 13 of claim 6, "e.g." in claim 6 are vague and indefinite, should not be used in claim language.

The phrase inside parentheses on line 17 of claim 1 is vague and indefinite because it's unclear if it's part of the claim or not.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-8, are rejected under 35 U.S.C. 102(b) as being anticipated by US 4001597 (Graff).

Graff discloses an electric generating system comprising a plurality of base members on ocean bed comprising cylinders 11, 12 with check valves at fluid inlets 19, 20 and outlet 16; 17, turbine 16 connected to the outlets and drive electric generator 1. Wave operated plates 23 hinged to the base member to compress the cylinder.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 9, 10, are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 4001597 (Graff). Graff discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the output fluid can be used for different purposes (claim 6), the specific depth (claims 9-10). However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to utilize the output fluid for different purposes in Graff for the purpose of driving different devices, and to select different depth to get different wave pressure.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Williams, Sieber, Parker, Girden, Wirt, Garza, and Jackson disclose wave power plants comprising fluid driven devices at the ocean base.
